

## SHORT CV

Carla **CHIARANTONI**. University researcher. PhD in Civil Engineering. Since 2011 she is aggregate professor of Architectural Engineering at Department of Civil, Environmental, Land, Building Engineering and Chemistry – DICATECh at Polytechnic University of Bari.

Her research focuses on changes in housing models applicable to social housing and, consequently, on the definition of new housing models and dimensional standards for emerging social categories.

In this perspective, it is of particular importance to propose a methodology for the regeneration of existing housing with a different approach to the relationships between the various domestic spaces.
